Summary

Full-Stack Developer with hands-on experience building and shipping features on a production SaaS platform, plus five independent full-stack projects. Comfortable across the stack: React/Next.js frontends, Node.js/TypeScript backends, PostgreSQL and Redis, authentication and authorization, real-time systems, and background job processing.

Technical Skills

Languages: TypeScript, JavaScript, Python, PHP, SQL
Frontend: React.js, Next.js, TanStack Router, TanStack Query, Tailwind CSS, HTML5, CSS3
Backend: Node.js, Express.js, FastAPI, TSOA, REST APIs, MVC Architecture
Databases & Caching: PostgreSQL, MongoDB, MySQL, Redis, Prisma, TypeORM
Authentication & Security: OAuth 2.0, JWT, JWT Refresh Token Rotation, TOTP 2FA, RBAC, Clerk, Zod
Systems & DevOps: Docker, Linux, Git, GitHub Actions, CI/CD, Socket.IO, Redis Pub/Sub, BullMQ, Cron Jobs
AI / ML: Google Gemini API, LLM Integration, NumPy, Pandas, Matplotlib, Seaborn, scikit-learn, Regression, Classification

Experience

Full-Stack Developer Intern, Stradmont Solutions *July 2026 – September 2026*
Bhaktapur, Nepal

- Contributed backend services, database models, and REST APIs to Builderbase, a production SaaS platform, using Node.js, TypeORM, and PostgreSQL, alongside React/TypeScript dashboard features.
- Built user, authentication, rank, organization, CRM, task, goal, shop, and licensing modules.
- Implemented role-based access control and organization hierarchy using rank relationships and closure-table tree structures.
- Built real-time notifications with the Outbox Pattern, Redis Pub/Sub, and Socket.IO, powering live notifications, badge updates, and toast alerts.
- Implemented cron-based scheduled jobs with Redis and BullMQ for licensing reminders, onboarding reminders, and CRM notification workflows.
- Built reusable frontend components and dashboard features with React, TypeScript, TanStack Router, Ant Design, and Tiptap.
- Worked with Git, Linux, and Docker in a CI/CD-oriented deployment workflow.

Projects

URL Shortener *TypeScript, TSOA, TypeORM, PostgreSQL, Redis*

- Built a URL shortening service with instant redirects, optional accounts, QR code generation, click tracking, and a management dashboard.
- Used Redis caching for fast redirects while storing persistent link data in PostgreSQL.

Full-Stack Authentication System *Next.js, TypeScript, Prisma, PostgreSQL, SendGrid*

- Built authentication with Google/GitHub OAuth, JWT access and refresh token rotation, and TOTP-based two-factor authentication.
- Added transactional email flows, RBAC, rate limiting, and Zod validation.

RoomFinder *Next.js, Node.js, MongoDB, Clerk, Cloudinary*

- Built and deployed a room rental platform for the Nepal market with separate landlord and tenant workflows.
- Implemented authentication, RBAC, search, filtering, pagination, wishlists, booking availability, and image uploads.

Crop Disease Detection *CNN, FastAPI, Python, MERN*

- Built the full-stack side of a crop disease detection platform powered by a CNN model that analyzes crop images.
- Implemented Node.js/Express APIs, MongoDB persistence, JWT authentication, image uploads, and bilingual prediction-based advice.

Gemini AI Chatbot *React, Node.js, Express.js, Google Gemini API*

- Built a full-stack chatbot connecting a React frontend to Google Gemini through a Node.js/Express backend.
- Handled AI requests server-side and rendered markdown responses for a conversational interface.

Education

Bachelor of Information Technology, Bhaktapur Multiple Campus *Expected 2027*
Bhaktapur, Nepal
